

Langchain application UI—Improvements

1. Multiple input types: PDF, DOCX, XLSX, CSV, TXT, Markdown, JSON, PNG, GIF, JPG, JPEG, and WebP

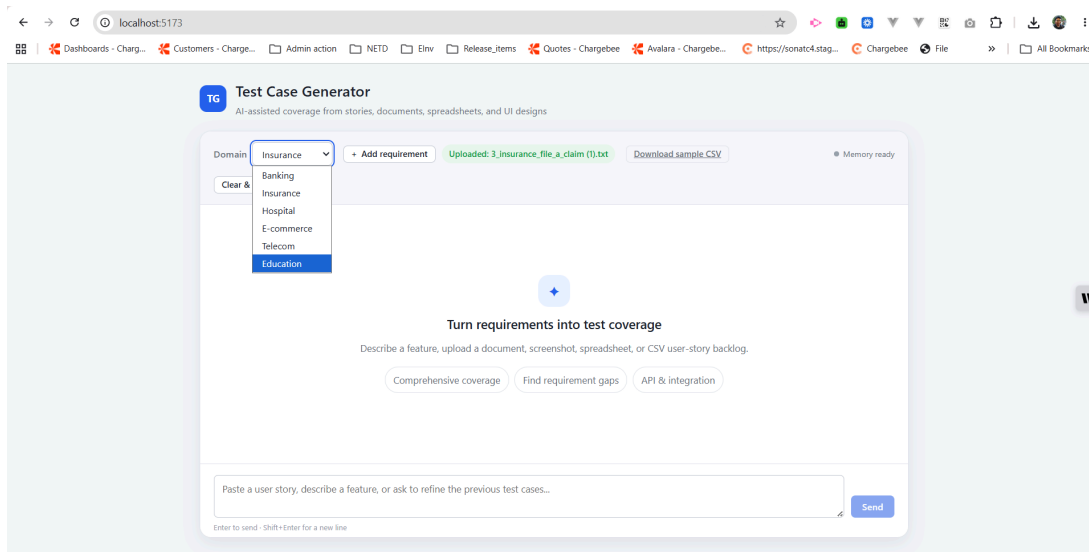

2. Downloadable sample user-story CSV

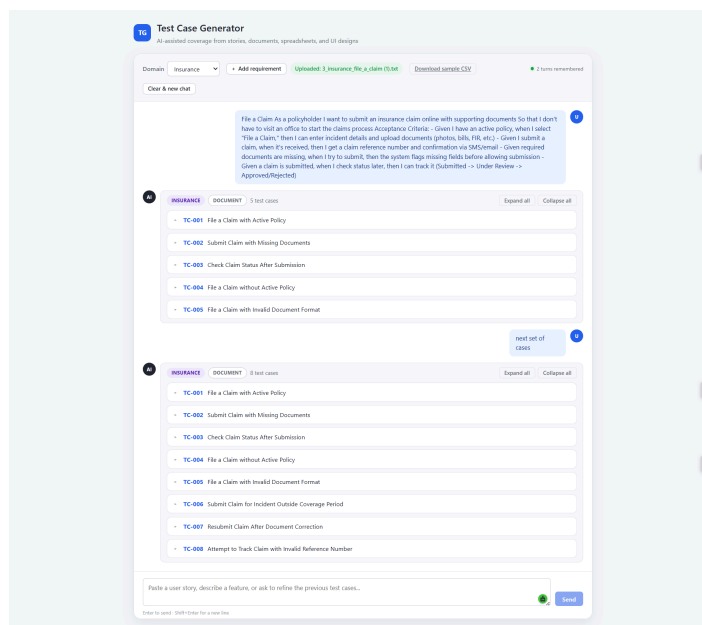

3. Additional domains:

- Banking
- Insurance
- Hospital
- E-commerce
- Telecom
- Education

4. Conversation memory for follow-up refinements and visible memory status and remembered-turn count

5. Export options for generated cases

The screenshot shows a web application interface for generating and managing test cases. At the top, there's a browser address bar showing 'localhost:5173'. Below it, a navigation bar contains several tabs: 'Dashboards - Charg...', 'Customers - Charge...', 'Admin action', 'NETD', 'Envr', 'Release_items', 'Quotes - Chargebee', 'Avalara - Chargebe...', 'https://sonatc4.stag...', 'Chargebee', and 'File'. The main content area is a chat interface with a 'Clear & new chat' button at the top left. A user message (blue bubble) describes a user story: 'File a Claim As a policyholder I want to submit an insurance claim online with supporting documents So that I don't have to visit an office to start the claims process Acceptance Criteria: - Given I have an active policy, when I select "File a Claim," then I can enter incident details and upload documents (photos, bills, FIR, etc.) - Given I submit a claim, when it's received, then I get a claim reference number and confirmation via SMS/email - Given required documents are missing, when I try to submit, then the system flags missing fields before allowing submission - Given a claim is submitted, when I check status later, then I can track it (Submitted -> Under Review -> Approved/Rejected)'. Below the chat, there's a section titled 'INSURANCE' with a sub-tab 'DOCUMENT' and '5 test cases'. To the right of this section are buttons for 'Copy all', 'Export', 'Expand all', and 'Collapse all'. The 'Export' dropdown menu is open, showing options: 'Export', 'CSV', 'JSON', and 'Markdown'. Below the export options, there's a list of five test cases, each with a title and a description: 'TC-001 File a Claim Successfully with All Required Documents', 'TC-002 Submit Claim with Missing Required Documents', 'TC-003 Track Claim Status After Submission', 'TC-004 Submit Claim with Insufficient Details', and 'TC-005 Submit Claim and Receive Confirmation'. At the bottom of the chat interface, there's a text input field with the placeholder 'Paste a user story, describe a feature, or ask to refine the previous test cases...' and a 'Send' button. A small note at the very bottom says 'Enter to send - Shift+Enter for a new line'.

File a Claim As a policyholder I want to submit an insurance claim online with supporting documents So that I don't have to visit an office to start the claims process Acceptance Criteria: - Given I have an active policy, when I select "File a Claim," then I can enter incident details and upload documents (photos, bills, FIR, etc.) - Given I submit a claim, when it's received, then I get a claim reference number and confirmation via SMS/email - Given required documents are missing, when I try to submit, then the system flags missing fields before allowing submission - Given a claim is submitted, when I check status later, then I can track it (Submitted -> Under Review -> Approved/Rejected)
