Visual validation report

68/100 — high

Three UI issues detected: duplicate header and card rendering, split card component, and missing 'Pro' button in the lower card instance.

Job 55420aa9-8683-4970-b1c7-7afbc7c71550 · current-sprint · 2026-08-15T10:51:01.342Z

Recommendations

- Remove the duplicate rendering of the header and card components.
- Ensure the 'Plan' card renders as a single contiguous block.
- Verify that all card instances contain the same set of buttons and controls.
- Add automated visual regression tests to catch duplicate rendering early.
- Implement a component registry to prevent accidental duplication of UI elements.
- Use layout grids to enforce consistent spacing and alignment across cards.
- Validate button presence and functionality in each card instance during CI builds.
- Document the expected card structure and share with the design and development teams.

REGRESSION

Compare an existing interface

Use screenshots captured at matching viewport dimensions for the clearest evidence.

Comparison mode

Pixel (ResembleJS)

ResembleJS pixel-to-pixel comparison only. No vision AI is used.

Text (AI)

AI extracts text from both screenshots, followed by deterministic text comparison.

Hybrid (Pixel + AI)

Runs both ResembleJS pixel comparison and AI text comparison.

EXECUTIVE SUMMARY

What changed

Hybrid regression detected 2 text changes (one moved, one changed) and 1.050483% pixel mismatch exceeding the 0.1% threshold. Overall score 18, severity low.

NEXT STEPS

Recommended actions

1

Verify intentionality of moved "Pro" text.

2

Confirm change from "Account settings" to "Settings" is correct.

3

Inspect flagged pixel regions for visual regressions.

4

Adjust pixel mismatch threshold if acceptable.

5

Re-run regression after UI fixes.

6

Add automated checks for text similarity >0.8 to flag changes.

Postman Collection

Current Sprint

The screenshot shows the Postman interface with the 'createCurrentSprintJob' endpoint selected. The endpoint is a POST request to 'http://localhost:5174/api/v1/jobs/current-sprint'. The body is set to 'form-data' and contains two files: 'currentImage' and 'scenario_2_baseline.png'. The response is a 202 Accepted status with a 23 ms response time and a 1.63 KB body. The response body is a JSON object with the following structure:

```
{
  "data": {
    "id": "ccd9d951-ed69-4495-aed1-61f7e67484fb",
    "workflow": "current-sprint",
    "mode": null,
    "status": "queued",
    "progress": 0,
