

RAG Pipeline—With Cohere Embedding

User Story

Postman

Testcases:

The screenshot shows the 'Convert to JSON' interface of the RAG Pipeline. The left sidebar contains navigation options: 'Convert to JSON' (selected), 'Embeddings & Store', 'Query Preprocessing', 'Vector Search', 'BM25 Search', 'Hybrid Search', 'Score Fusion', and 'Summarize & Dedup'. The main content area is titled 'Convert to JSON' and includes a 'File Upload' section with a 'Data Type' dropdown set to 'TC: Test Cases'. Below this is a 'SELECT EXCEL FILE (TEST CASES)' button and a file selection area showing 'testcases.xlsx' (346.1 KB) as the selected file. The 'Sheet Name' is 'testcases'. At the bottom are 'CONVERT TEST CASES' and 'RESET' buttons. On the right, a blue sidebar lists the 'Expected Test Cases Columns': Module, Test ID, Pre-Requisites, Test Title, Test Case Description, Test Steps, Expected Results, Automation/Manual, Priority, Created By, Created Date, Last modified date, and Risk.

The screenshot shows the 'Embeddings & Store' interface of the RAG Pipeline. The left sidebar is the same as the previous screenshot, with 'Embeddings & Store' now selected. The main content area is titled 'Embeddings & Store' and shows 'Available Files' with 7 JSON files found. A table lists the files with columns for File Name, Size, Modified, and Type. The file 'converted-1786283552107.json' is selected. To the right, there is an 'Actions' section with a 'CREATE EMBEDDINGS' button and a 'Debug Info' section showing details for the selected file. Below this is a 'Processing Time' section and a 'Selected Files' list containing 'converted-1786283552107.json'.

	File Name	Size	Modified	Type
